

AVIGUARD ACCUSPRAYER

Metered Dose Spray Applicator

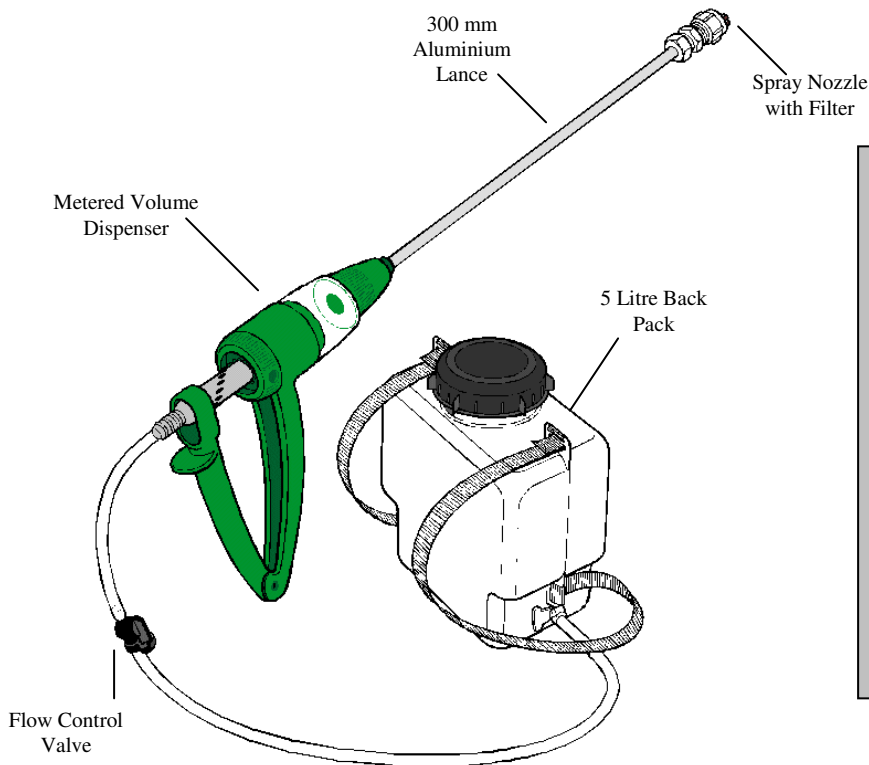

The Aviguard Accusprayer is a metered dose professional spray applicator with the facility to 'dial-in' the pre-determined measured volume of spray liquid to be dispensed.

The spray nozzle is selected to deliver a coarse spray droplet (250 - 350 μ m) in the appropriate spray pattern. A non-drip check valve is fitted as standard.

The Aviguard Accusprayer is ideally suited to manual spray application of a small number of birds in the hatchery or on farm.

The Aviguard Accusprayer is supplied with a 5 litre backpack with filter and wide neck to facilitate ease of cleaning and filling. Liquid flow can be shut off using the in-line tap which allows for disconnection of the backpack and hand lance.

Specification

Weight: 860g

Volume Dispensed: 2.5 – 25ml per shot

Total Capacity: 5 Litres

Length of Lance: 300mm

Nozzle: Flat Fan

Droplet Size Range: 250 – 350 μ m
(Coarse Spray)
