

# AVIGUARD AUTOSPRAYER

## Metered Dose Spray Applicator

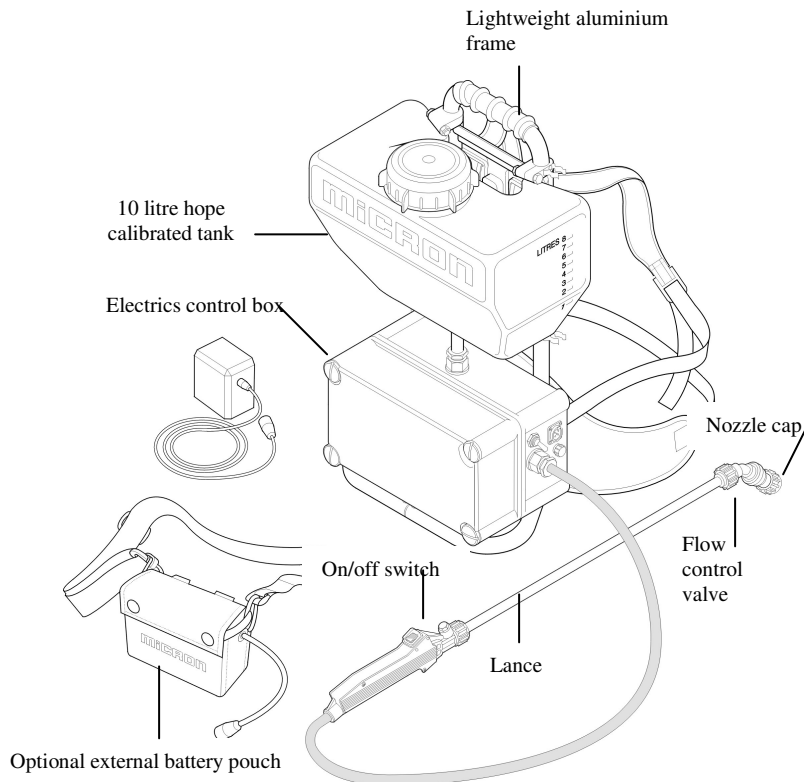

The Aviguard Autosprayer is a high quality metered dose professional spray applicator.

The sprayer is electrically operated from a small rechargeable 12v DC battery with an electronically controlled pump delivering a precise and repeatable metered volume of spray liquid. This allows the professional user to apply Aviguard accurately and effortlessly to a large number of birds.

The Aviguard Autosprayer is supplied with a 10 litre backpack, with a large filling aperture and filter, supported on an ergonomically designed lightweight aluminium back frame. It has a metal lance and integral thumb switch. The sprayer is supplied with a battery re-charger.

The battery, electronic controller and pump are housed in a tough hermetically sealed GRP case for superior durability. The combination of nozzle tip and pressure control flow valve allows the user to set a measured and repeatable spray volume.

### Specification

Weight: 8 Kg (empty)  
Voltage: 12V DC  
Power Requirement: 1.5amps 18 Watts  
Pump: 12V DC diaphragm pump  
Total Capacity: 10 Litres  
Controls: Electric – 3 positions  
off/intermittent/continuous  
Flow: Control flow valve (1.5bar,  
20psi)  
Nozzle: Choice of 3 Flat Fan nozzles  
Droplet Size: Coarse Spray
